

Assistive Technology

Free device demonstrations!

MERIL has an assistive technology demonstration site that is free and open to the public. This demonstration site allows people to try out a wide variety of assistive devices – such as phones and computer equipment – so they can find a device that makes it easier for them to live independently and safely in their home.

Free devices are available!

We have devices that help people who experience low vision, hearing loss, mobility issues, and other types of disabilities. Many people qualify for free devices, such as free telephones from Missouri Assistive Technology's "TAP" program. During your demonstration, we will tell you about all of the resources available to you.

We accept donated items!

We accept items that are no longer of use to their previous owners, test them, and make them available at no cost to people who can benefit from them. MERIL also accepts donations of wheelchairs, walkers, canes, and similar assistive equipment.

Visit meril.org/tech for more information.
